Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9 and 10 recite "The method of..." in the preamble; but go on to recite structure and not method steps. It is unclear whether the applicant is trying to claim method or structure type claims.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 7 and 8 are rejected under 35 U.S.C. 102(a) as being anticipated by Rodgers.

Rodgers shows a device having left and right skates 104, left and right foot supports 200 which are pivotally mounted to the skates, bias means 106 for skiing motion and bias means 204 for stepping motion.

With respect to claims 7-8, note pulleys 108-109, springs 204 interconnected between the pulleys, left and right links 104 linked to the first pulley via cable 114, foot supports 2002 which pivot in a second direction perpendicular to the base and linked to the pulleys via cable 114.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1,2,9,10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rodgers in view of Garcia.

Garcia teaches the use of adjustment means 27 for adjusting a spring 31 which provides resistance to the pivoting action of a foot support 17. Given this teaching, it would have been obvious to one skilled in the art to provide the Rodgers device with an adjustable spring for permitting variable resistance to the user for exercising the calf muscles.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 7-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-40 of U.S. Patent No. 6302830.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed structure is met by the patented claims

8. Claims 1,2,9,10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-40 of U.S. Patent No. 6302830 in view of Garcia.

Garcia teaches the use of adjustment means 27 for adjusting a spring 31 which provides resistance to the pivoting action of a foot support 17. Given this teaching, it would have been obvious to one skilled in the art to provide the Rodgers device with an adjustable spring for permitting variable resistance to the user for exercising the calf muscles.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
